SUMMER INSTITUTE 2018 XI EDITION

## FOOD SECURITY STUDIES IN ITALY

June 25th - July 6th 2018

### Food Security & Resilience

The purpose of this course is to understand what are the elements and dynamics of resilient food systems – as well as the people, communities, relations, and policy that contribute to resilience. Impacts of rapidly globalizing food systems on food and nutrition security at local, household, and intra-household levels will be explored, highlighting interactions with gender identities. These issues promote a great deal of debate and have encouraged the development of a number of modern initiatives to counterbalance socio-economic and environmental effects related to these changes.

The courses in Italy are realised with the collaboration of cultural organisation Punti di Vista and held in the ancient Franciscan Convent S. Maria del Giglio in Bolsena, in the very center of Italy, at the junction of Tuscany, Umbria and Latium. see more at:
